IVY LEAGUE WRESTLING CHAMPIONSHIP

2026 Matchup Prediction Report

Machine Learning Model Predictions Across All 10 Weight Classes

■ POWERED BY MACHINE LEARNING

Weight	Predicted Champion	School	Model Consensus
125 lbs	Marc-Anthony McGowan	Princeton	■ Unanimous
133 lbs	Evin Gursoy	Columbia	■■ Split (2/4)
141 lbs	Vince Cornella	Cornell	■■ 3/4 Models
149 lbs	Jaxon Joy	Cornell	■ Unanimous
157 lbs	Meyer Shapiro	Cornell	■ Unanimous
165 lbs	Cesar Alvan	Columbia	■■ 3/4 Models
174 lbs	Simon Ruiz	Cornell	■■ Split (2/4)
184 lbs	Joe Curtis	Columbia	■ Unanimous
197 lbs	Andrew Reall	Brown	■■ 3/4 Models
285 lbs	Vincent Mueller	Columbia	■■ 3/4 Models

This report uses four machine learning models (Logistic Regression, Decision Tree, XGBoost v1, XGBoost v2) trained on historical Ivy League wrestling data to predict match outcomes.

THE PREDICTION MODELS

Four machine learning models, each using different algorithms and feature sets

MODEL 1 — LOGISTIC REGRESSION — BASELINE MODEL

Logistic Regression estimates the probability of a binary outcome (win/loss). It finds the best-fit line through data, then applies a sigmoid function to convert scores into probabilities between 0 and 1. Simple, interpretable, and serves as a strong baseline — if a wrestler has a significantly higher win rate, this model predicts them to win.

Features: 1 feature:

win_rate_diff (home win rate – away win rate)

MODEL 2 — DECISION TREE — 33 FEATURES

A Decision Tree builds a flowchart of if/else rules learned from data. It splits on the feature that best separates winners from losers at each node. Naturally handles non-linear relationships — you can trace exactly why the model predicted a given outcome.

Features: 33 features:

wrestled_before · home_point_diff_rematches · home_pinned_away · matches_wrestled_diff · win_rate_diff · bonus_rate_diff · pin_count_diff · avg_point_diff_diff · avg_points_scored_diff · std_point_diff_diff · weight_class encodings (10) · home academic class encodings (7) · away academic class encodings (7)

MODEL 3 — XGBOOST v1 — 33 FEATURES

XGBoost builds an ensemble of decision trees sequentially — each new tree corrects errors of the previous ones. Highly accurate, handles missing data natively, and captures complex non-linear feature interactions that simpler models miss.

Features: 33 features (same as Decision Tree above)

MODEL 4 ★ — XGBOOST v2 ★ — BEST MODEL — 34 FEATURES

Same XGBoost algorithm as Model 3, but with one critical additional feature: **team_rank_diff** — the difference in national team rankings between the two wrestlers' programs. This captures coaching quality, depth of daily competition, program resources, and recruiting strength — contextual signals not visible in individual statistics alone.

Features: 34 features (all Decision Tree features) + team_rank_diff

wrestled_before · home_point_diff_rematches · home_pinned_away · matches_wrestled_diff · win_rate_diff · bonus_rate_diff · pin_count_diff · avg_point_diff_diff · avg_points_scored_diff · std_point_diff_diff · **team_rank_diff** ← **UNIQUE TO THIS MODEL** · weight_class encodings (10) · home academic class encodings (7) · away academic class encodings (7)

HOW TO INTERPRET THE AGREEMENT %

Understanding model consensus across all four algorithms

Agreement % Formula:

Agreement % = (Matchups where ALL 4 models predict same winner) ÷ (Total matchups) × 100

Example: In the 157 lbs weight class, there are 15 possible matchups. All 4 models agreed on the same winner in 12 of them — giving 12/15 × 100 = 80.0% agreement.

How to read it:

Agreement %	Interpretation
90 – 100%	Very high confidence — models strongly agree
75 – 89%	High confidence — a few close, unpredictable matchups
60 – 74%	Moderate confidence — several contested matchups
Below 60%	Low confidence — many unpredictable matchups

■ **Unanimous**	= All 4 models predict the same champion
■■ **No unanimous**	= At least one model disagrees on the champion
True (in matchup table)	= All 4 models agree on the winner of that bout
False (in matchup table)	= At least one model disagrees on the winner

125 lbs WEIGHT CLASS
